The document provides the steps To become an active user in the Copado environments, developers and release managers need to set up an 'Org Credential', which serves as a connection between a user and a Salesforce environment

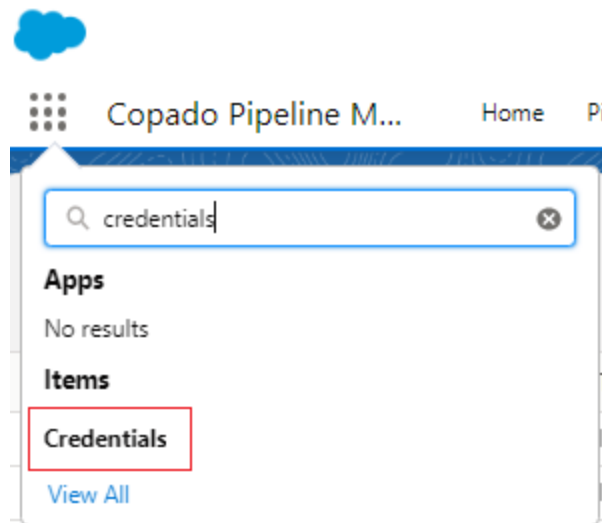

Org Credential Setup for Developers and Release Managers

- An org credential is a connection between a user and a Salesforce environment

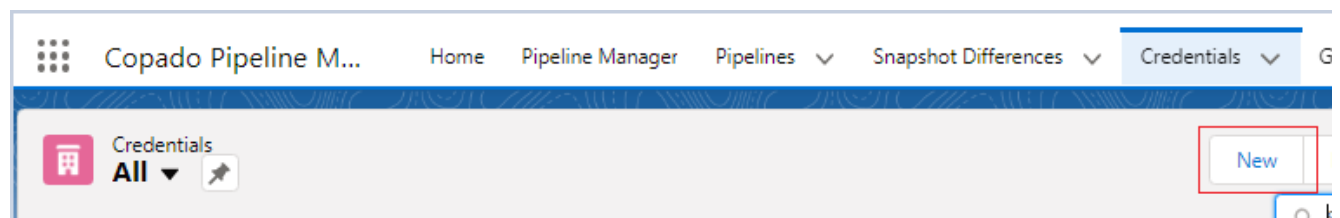

To become an active user in the Copado environments, you need to set up an 'Org Credential'.

Below are the steps to create your own Org Credentials in Copado.

1) Search for 'Credentials' in App Launcher

2) Click on the 'Credentials' Tab and click on 'New' Button towards top right.

3) Enter the following information. Important, Please select Custom Domain:

Org Name: **TeamName_FirstName_LastName**

For eg, if you are from Clinical team of ECOM org, it should be Clinical_FirstName_Lastname

Org Type: Custom Domain

Custom Domain for Production : <https://humanashared.my.salesforce.com>
(<https://humanashared.my.salesforce.com/>)

Custom Domain for Training (CopadoTrn) <https://humanashared--copadotrnsandbox.my.salesforce.com/> (<https://humanashared--copadotrnsandbox.my.salesforce.com/>)

Everything else should remain default. Then click on the 'SAVE' button.

Org Name *

Org Type

Custom Domain

Disable Validation ☐

Test Frequency

Default Credential ☐

Is Developer Hub Org ☐

Developer Hub Org

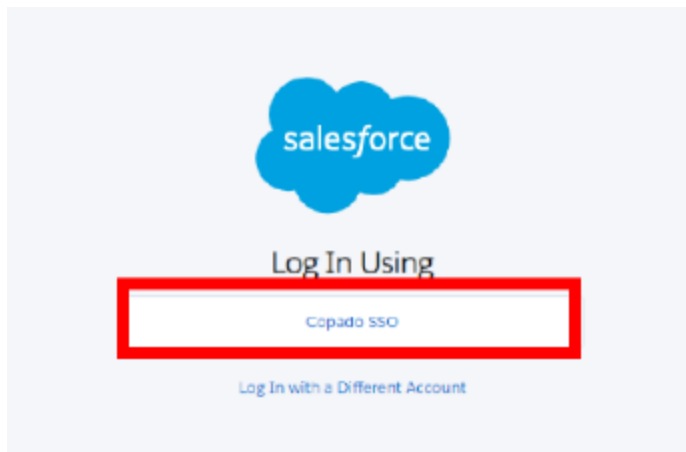

4) Click on the 'Authenticate' button on top left.

▼ Basic information

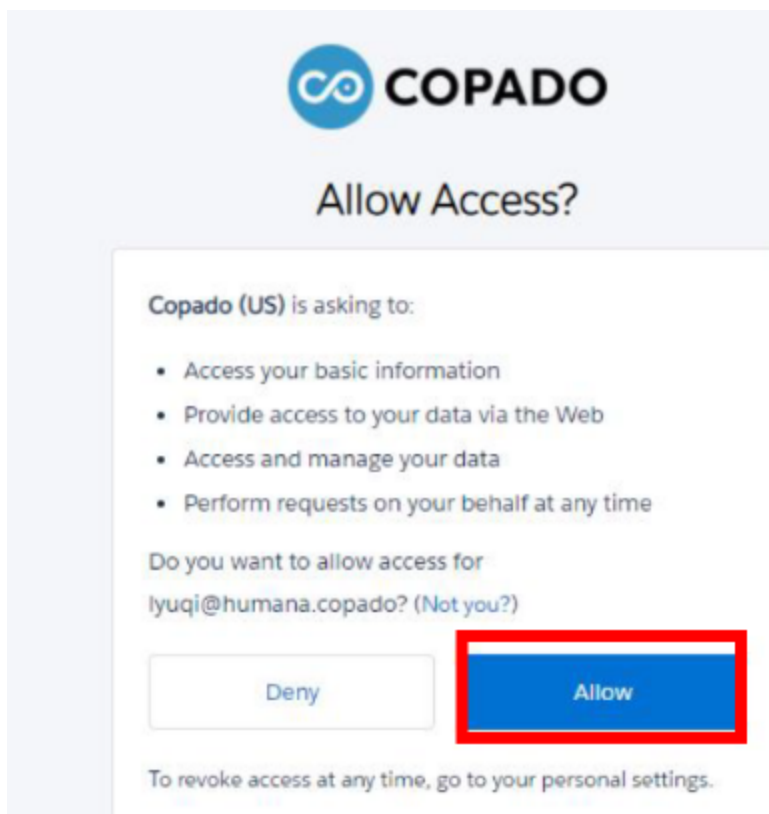

Org Name	Clinical_Sesha_Devathi	Environment	
Username		Profile Name	
Org Type	Custom Domain	Type Icon	
Custom Domain	https://humanashared.my.salesforce.com	SFDC Org ID	
Validated Date		Test Frequency	

5) This will open a new tab asking for login, click on 'Copado SSO'

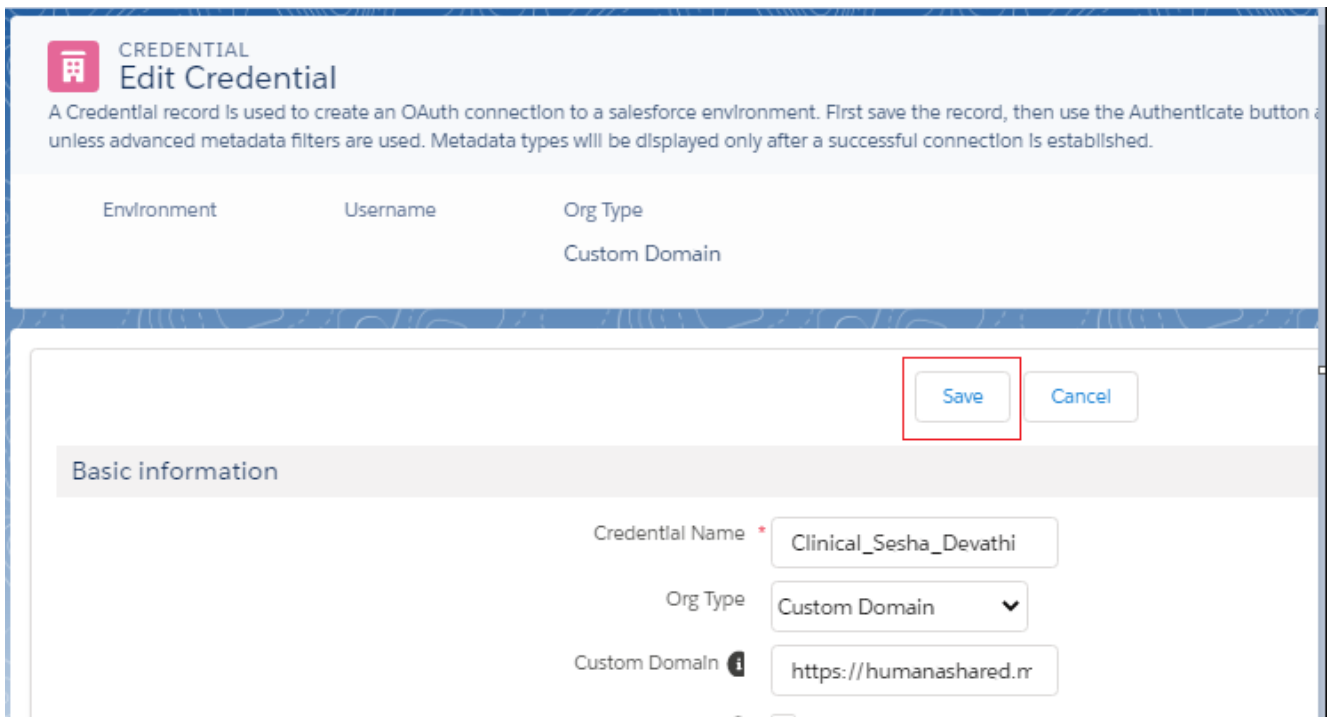

Note, if you do not see the 'Copado SSO' as shown in image, please make sure that you have selected Custom Domain as Org Type in Step 2.

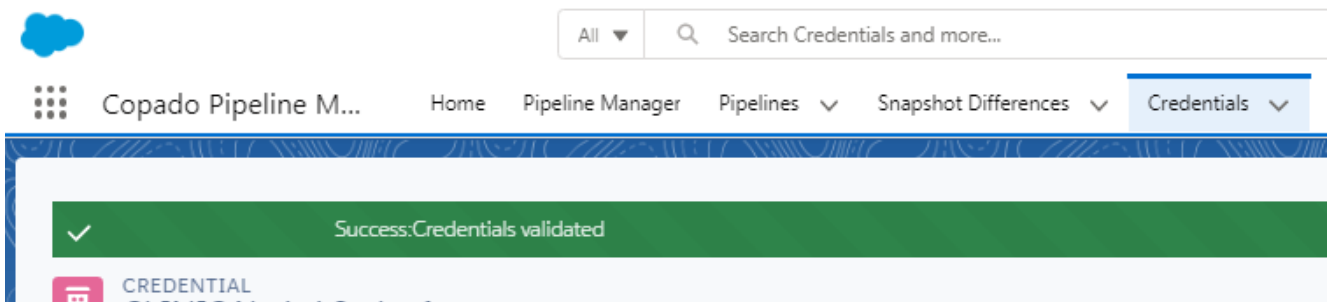

6) You will be directed to a new Page, click on 'Allow'.

7) Allow a few minutes for the page to load. You will be directed to a few different pages. Once loading is finished, click on 'Save'

8) After the 'Loading' popup goes away (takes a little bit of time), you have successfully created your Org Credential to the Copado environment

Disregard the 'insufficient access' reminder. You will see a green bar on top and no other credentials are needed. You will leverage the other ones already setup for different projects going forward.
