REFERENCE: [KB0100256](#) (https://humanaprod.service-now.com/kb_view.do?sysparm_article=KB0100256).

The document provides steps on HOW TO SETUP PEER REVIEW APPROVAL PROCESS

Add Custom Field as metadata for Security Approval process

Problem Statement: In current process, only the stories having Profile, Permission Sets and Sharing rules as metadata type were include for Second level Security approval.

Agenda: When Developers submits a PR for approval, make Second level approval mandatory for user stories having "Custom field" as metadata type.

Components:

Type	Name	Object	New/Update
Approval Process	Peer Review Approval Process	<u>copado__User_Story__c</u>	Update

Pre-requisites:

When Developer commits changes on user story, He/She will have to follow few steps.

- Run Managed Apex Test for code coverage if there are apex classes in story
- Run Static Code Analysis
- Open Pull Request in Azure

Once Pull Request has been raised on Azure, Azure Pull Request link will be updated on User Story using 'Copado On Pull Request Created'- Process flow.

Once the Developer submits their Approval Request, the PR will be assigned to the manually chosen first level approver (Senior/Lead Developers). Additionally, if the User Story contains security-related metadata component types (Profiles, Permission Sets, Sharing Rules, Custom Field) the PR will be required to be reviewed by a Second Level Security Review made up of the relevant Org's Security personnel. Any queue member can review the PR in Azure, and then approve/reject with the proper comments in Copado.

Approval Process:

Approval Steps ⓘ

Action	Step Number	Name	Description	Criteria	Assigned Approver	Reject Behavior
<a>Show Actions <a>Edit	1	First Level Approval			Manually Chosen	Final Rejection
<a>Show Actions <a>Edit	2	B2B Security	(User Story: Humana Org EQUALS B2B) AND ((User Story: Metadata Types in Selection INCLUDES Profile) OR (User Story: Metadata Types in Selection INCLUDES PermissionSet) OR (User Story: Metadata Types in Selection INCLUDES SharingRules) OR (User Story: Metadata Types in Selection INCLUDES CustomField)) , else Next Step		<a>Queue:B2B Security PR Approvals	Final Rejection
<a>Show Actions <a>Edit	3	Clinical Security	(User Story: Humana Org EQUALS Clinical) AND ((User Story: Metadata Types in Selection INCLUDES Profile) OR (User Story: Metadata Types in Selection INCLUDES PermissionSet) OR (User Story: Metadata Types in Selection INCLUDES SharingRules)) , else Next Step		<a>Queue:Clinical Security PR Approvals	Final Rejection
<a>Show Actions <a>Edit	4	Service Security	(User Story: Humana Org EQUALS Service) AND ((User Story: Metadata Types in Selection INCLUDES Profile) OR (User Story: Metadata Types in Selection INCLUDES PermissionSet) OR (User Story: Metadata Types in Selection INCLUDES SharingRules)) , else Next Step		<a>Queue:Service Security PR Approvals	Final Rejection
<a>Show Actions <a>Edit	5	Corporate Security	(User Story: Humana Org EQUALS Corporate) AND ((User Story: Metadata Types in Selection INCLUDES Profile) OR (User Story: Metadata Types in Selection INCLUDES PermissionSet) OR (User Story: Metadata Types in Selection INCLUDES SharingRules))		<a>Queue:Corporate Security PR Approvals	Final Rejection

Deployment Section:

- Commit all the technical components as mentioned in the document.
