CAREER OBJECTIVE:

A detail-oriented Salesforce DevOps Engineer with 3 years of experience in automating and optimizing deployments, ensuring seamless integration and efficient delivery pipelines. Passionate about leveraging my expertise in CI/CD, version control, and Salesforce best practices to drive innovation, enhance system reliability, and support agile development teams in achieving high-quality releases. Seeking to contribute to a forward-thinking organization where I can further hone my skills and support scalable, robust Salesforce environments.

PROFESSIONAL EXPERIENCE:

Salesforce DevOps Engineer at **Matsek LTD**

Nov 2021- Present

- Oversee end-to-end release management for Salesforce applications, including planning, scheduling, coordinating, and executing releases across various environments.
- Collaborate with development, testing, business, and cross-functional teams to understand release requirements, priorities, dependencies, and timelines.
- Manage and maintain Salesforce environments (development, testing and production) to ensure consistency, security, and reliability.
- Execute data transfer and environment refresh plans as part of the release cycle.
- Develop and maintain automated deployment procedures to streamline and standardize the release workflow.
- Implement CI/CD best practices within the Salesforce ecosystem using tools such as Azure DevOps, Copado, and Jenkins.
- Enforce version control strategies for Salesforce metadata and source code, ensuring traceability and facilitating rollbacks when necessary.
- Implement and maintain branching, merging, and conflict resolution strategies to preserve code integrity.
- Create comprehensive release notes, documentation, and communication plans to keep stakeholders informed about release schedules, changes, and potential impacts.
- Adhere to change management protocols and regulatory compliance requirements while deploying Salesforce releases, ensuring data integrity, security, and auditability.
- Measure and optimize key performance metrics associated with release management, striving for continuous improvement.
- Apply Salesforce performance enhancement strategies and industry best practices to ensure optimal

Technical Support Engineer L2 at **Zebra Technologies**

May 2021- Nov 2021

- Provided technical support for a workforce management system used by US clients, resolving complex issues and ensuring high customer satisfaction.
- Diagnosed and troubleshooted system issues, including configuration problems and software bugs, to maintain operational efficiency.
- Collaborated with development teams to escalate and resolve critical issues, contributing to product improvements and stability.

TECHNICAL PROFICIENCY / SKILLS:

- **Operating systems** : Linux, Windows
- **Scripting Languages** : Shell-Bash Scripting

- **Version control Tools** : Bit bucket, GIT, Source Tree
- **CI/CD Tools** : Jenkins, Azure DevOps, Copado
- **Development Methodologies** : Agile
- **Cloud** : Salesforce
- SFDX CLI, ANT
- JIRA, Atlassian Confluence, SonarQube, Gearset

CERTIFICATIONS:

- Platform App Builder 2022
- OmniStudio Developer 2023
- Copado Fundamentals I 2024
- Copado Fundamental II 2024

WORKED PROJECTS:

1. OnSemi – Sales & Service Cloud Implementation

Responsibilities:

- Implemented advanced features such as Bot and Einstein Classification to enhance system automation and functionality.
- Managed data migration from legacy systems to Salesforce using MuleSoft, ensuring data integrity and seamless transition.
- Developed and executed scripts for deploying metadata components, improving deployment efficiency.
- Successfully merged two Salesforce tracks (Sales and Service Cloud) into a unified system, streamlining operations and deployment strategies.
- Received client appreciation for delivering the project on time and meeting all specified requirements.

2. BCBS Salesforce DevOps Implementation

Responsibilities:

- Designed and implemented CI/CD pipelines, integrating Salesforce development with Bitbucket for effective version control.
- Established automated testing processes, including unit, integration, and end-to-end tests as part of the CI/CD pipeline.
- Coordinated releases of Salesforce applications, handling versioning, release notes, and deployment schedules to streamline processes and reduce risks.
- Implemented security scans and code reviews within the CI/CD pipeline, ensuring compliance with industry standards and identifying vulnerabilities.
- Monitored CI/CD pipelines and Salesforce applications, proactively resolving issues, performance bottlenecks, and errors.
- Assessed and improved CI/CD processes and automation scripts for better efficiency and code quality.

EDUCATION:

- B.E. - Ashokrao Mane Institutions, Shivaji University in 2020.
- HSC – Maharashtra Highschool and Junior collage Kolhapur in 2015.
- SSC – DBVD Highschool Kolhapur in 2013.
